

Highly Available Three-Tier Architecture

Week 6 | Day 1

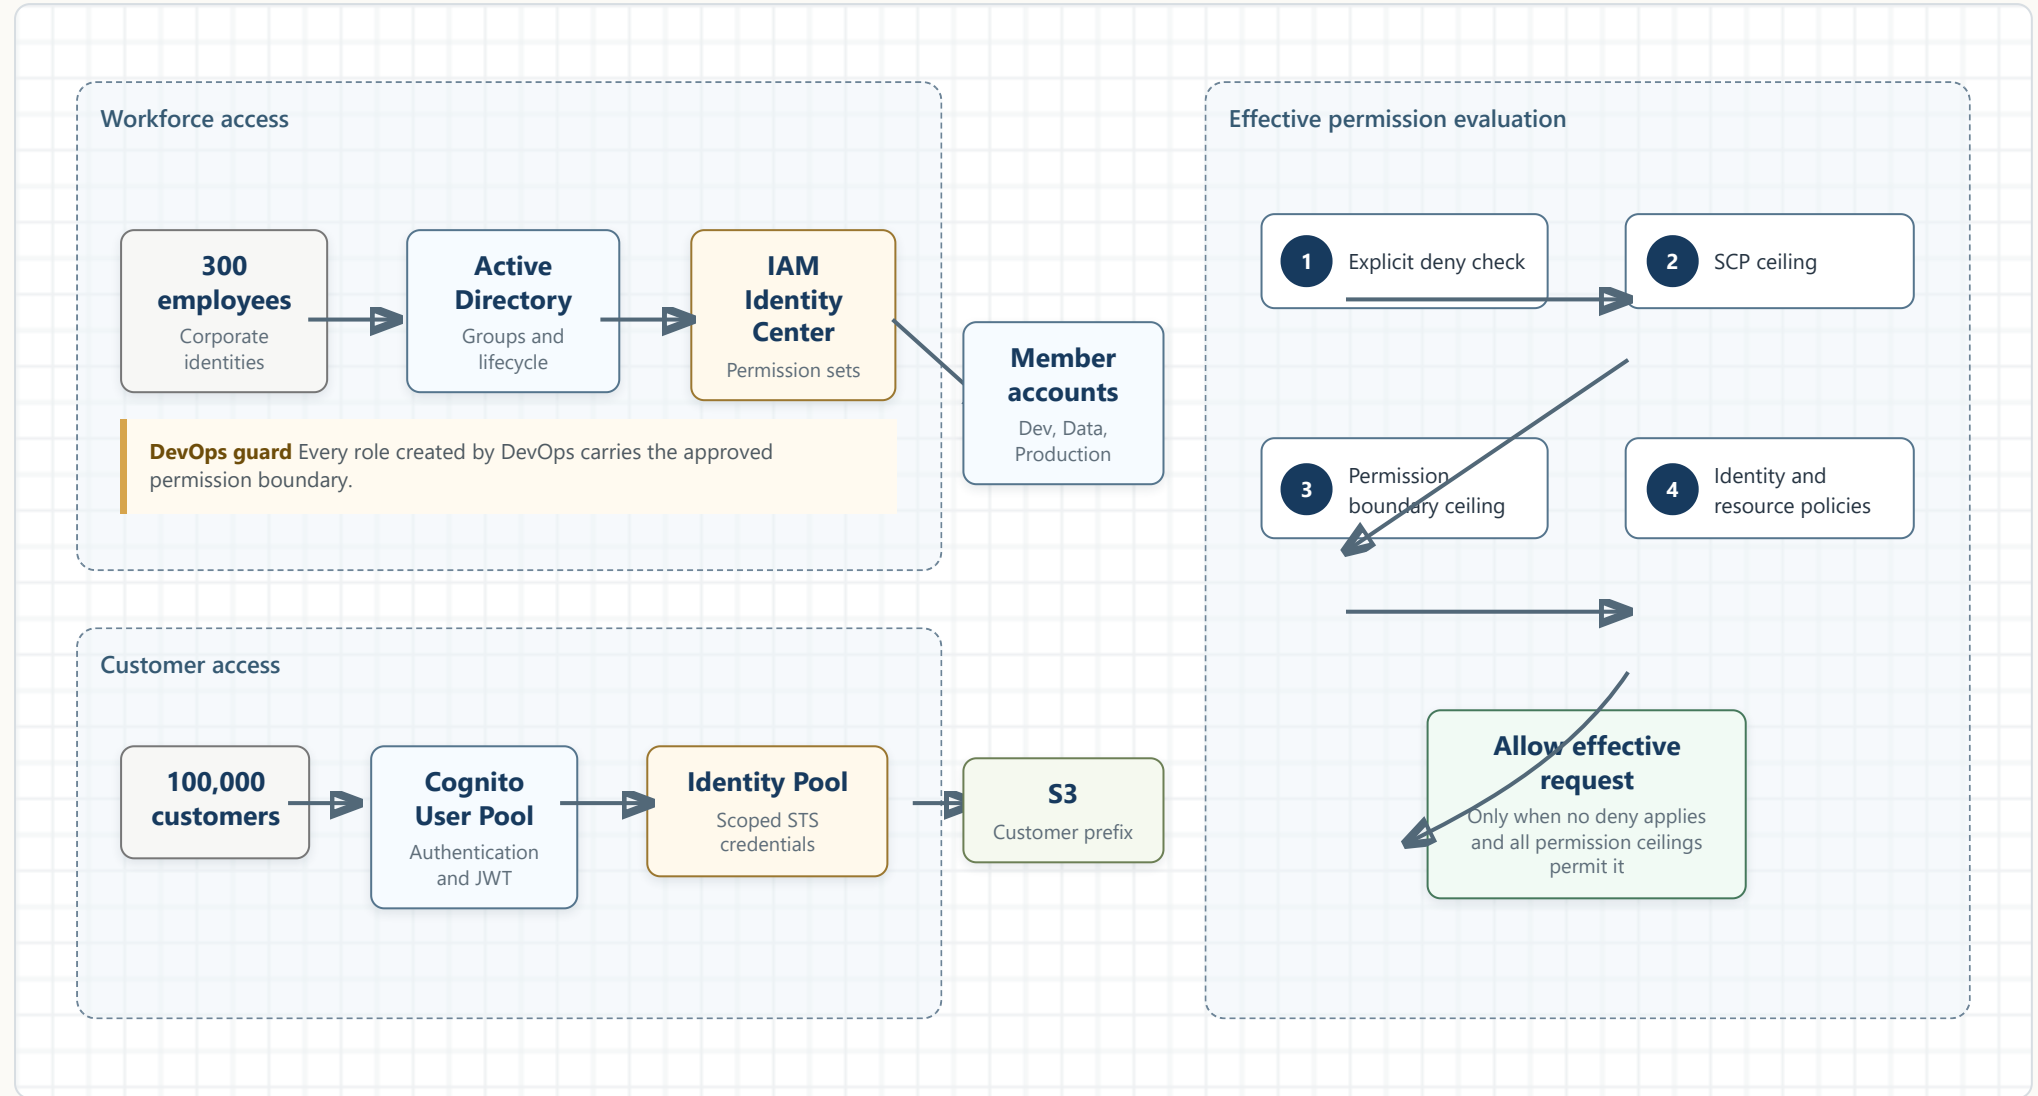

Two Availability Zones, independent NAT paths, Multi-AZ RDS, and Pilot Light recovery

Identity and Access Design

Week 6 | Day 2

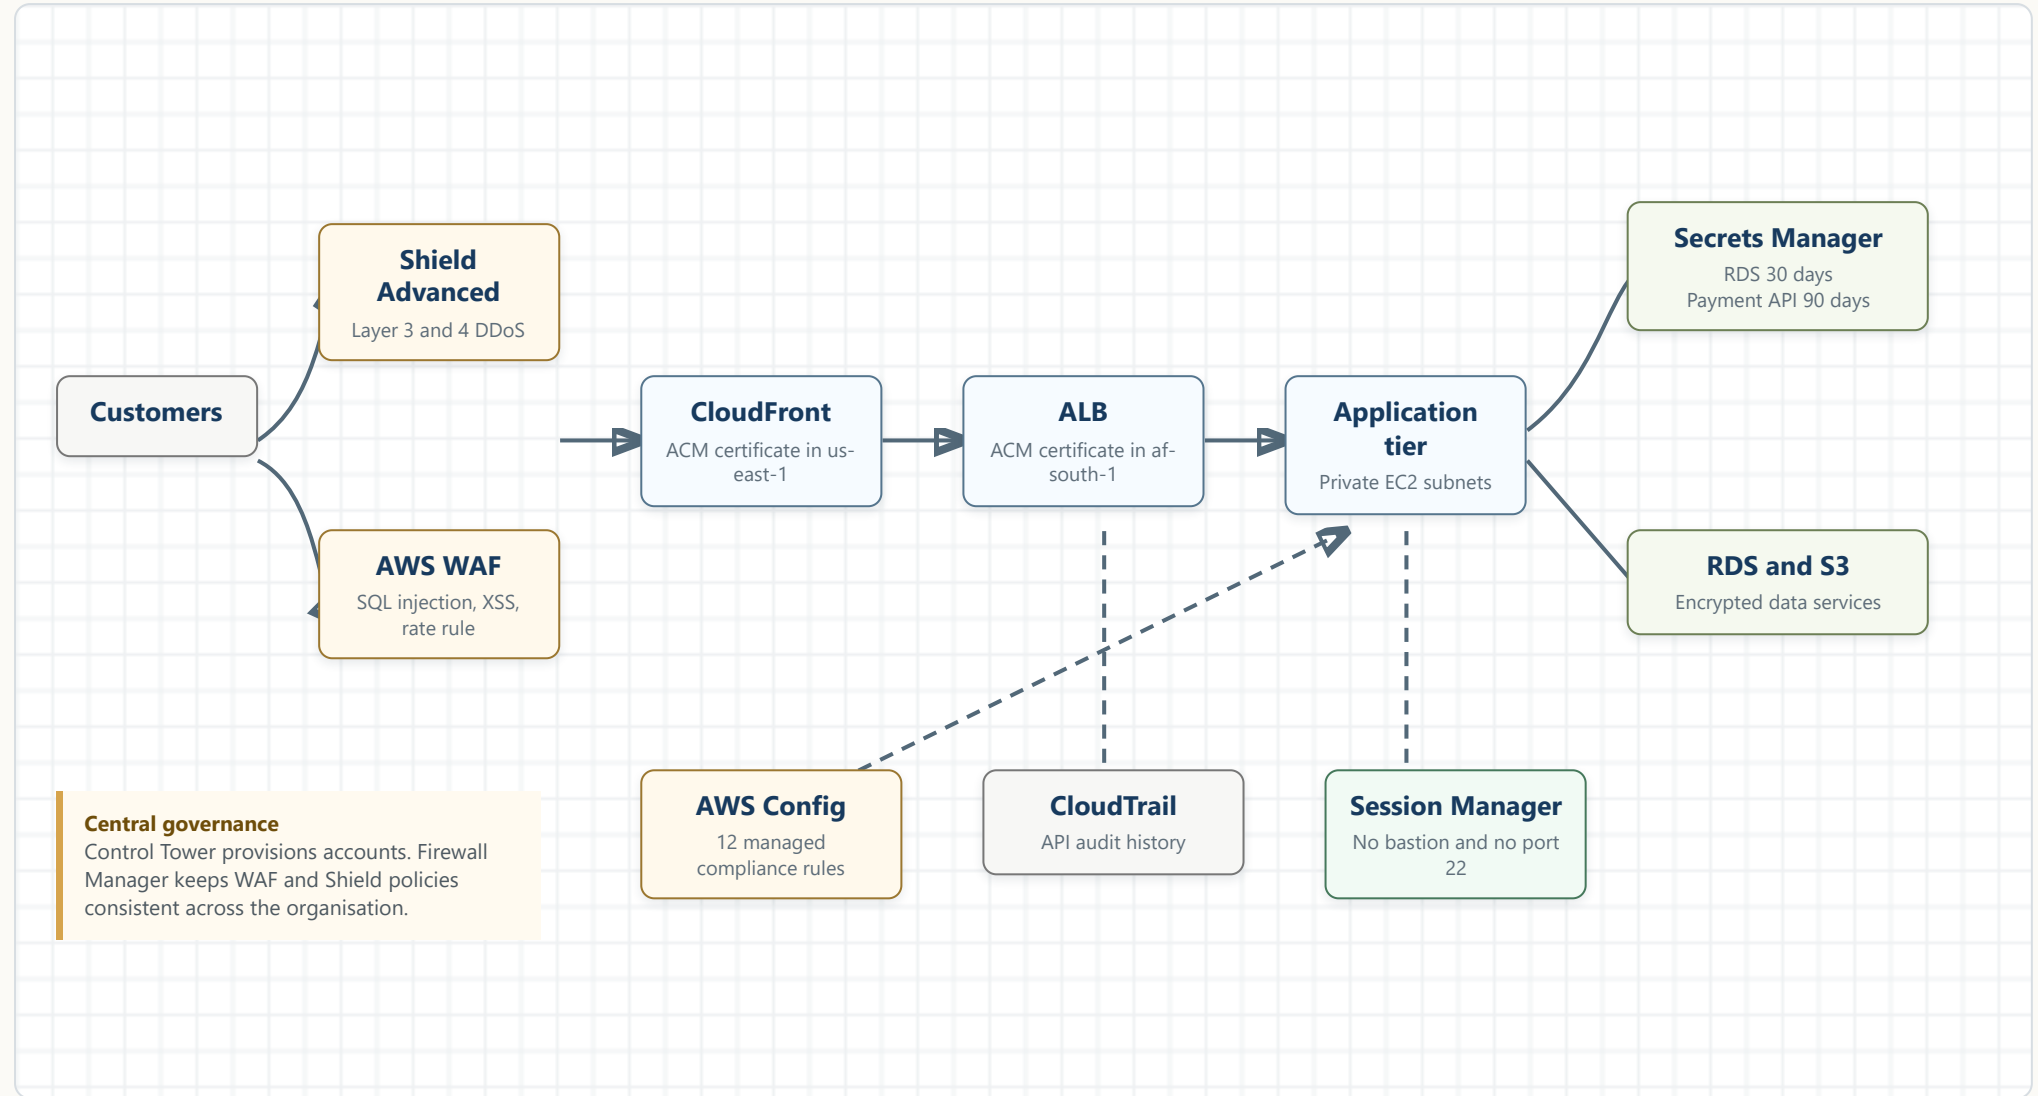

Workforce federation, customer federation, role boundaries, and policy evaluation

Security Services Placement

Week 6 | Day 3

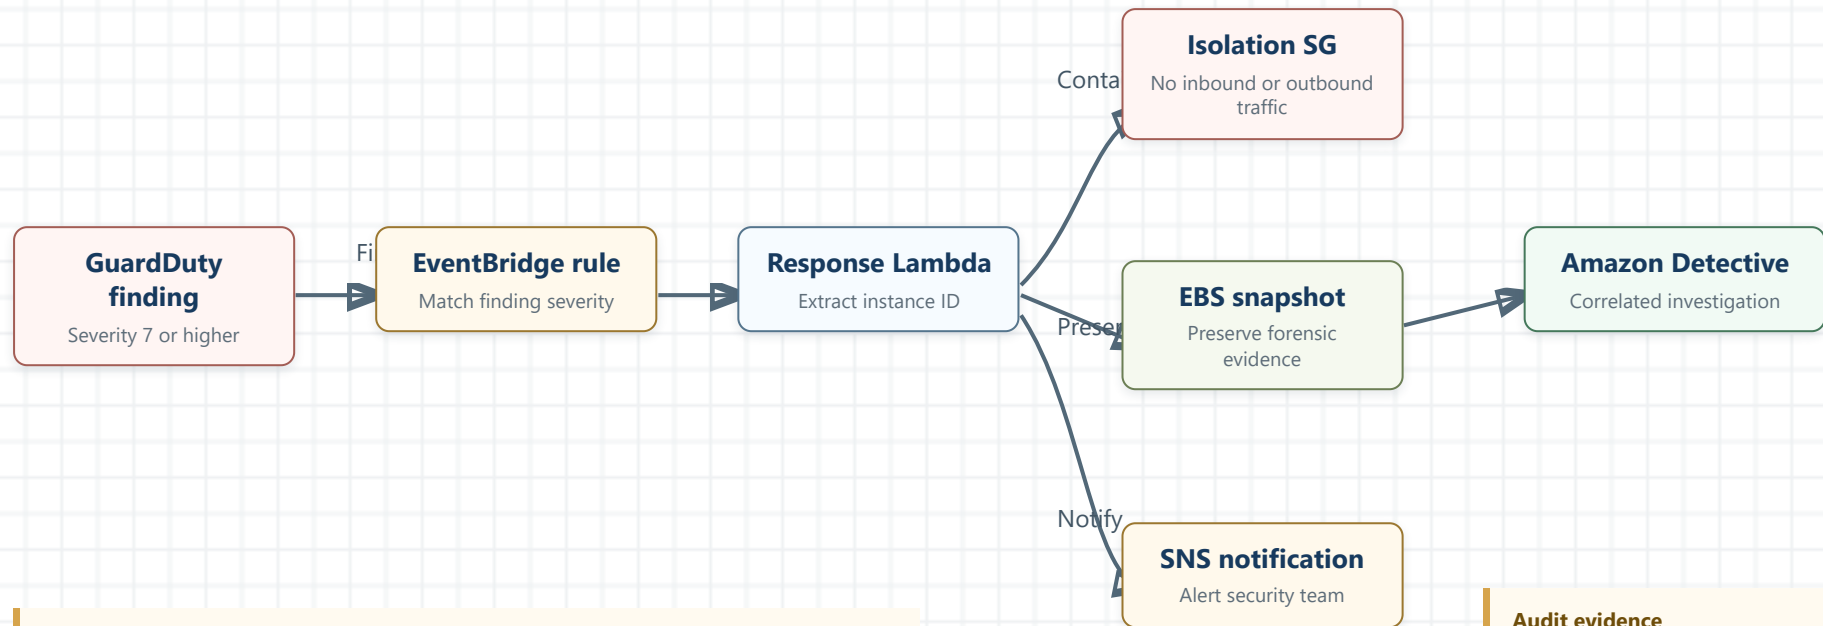

Edge protection, secrets, compliance evidence, and secure administration

Automated Incident Response

Week 6 | Day 4

GuardDuty detection to isolation, evidence preservation, notification, and investigation

VPC Flow Log example

203.0.113.25 to 10.0.11.15 port 22 TCP REJECT

The connection was blocked. Flow Logs contain metadata, not packet contents.

Audit evidence

CloudTrail records the API identity, source IP, time, and request. S3 data events must be enabled explicitly.

Week 6 Security Architecture

Week 6 | CISO summary

How availability, identity, protection, audit, detection, and response work together
