

Messaging and Workflow Architecture

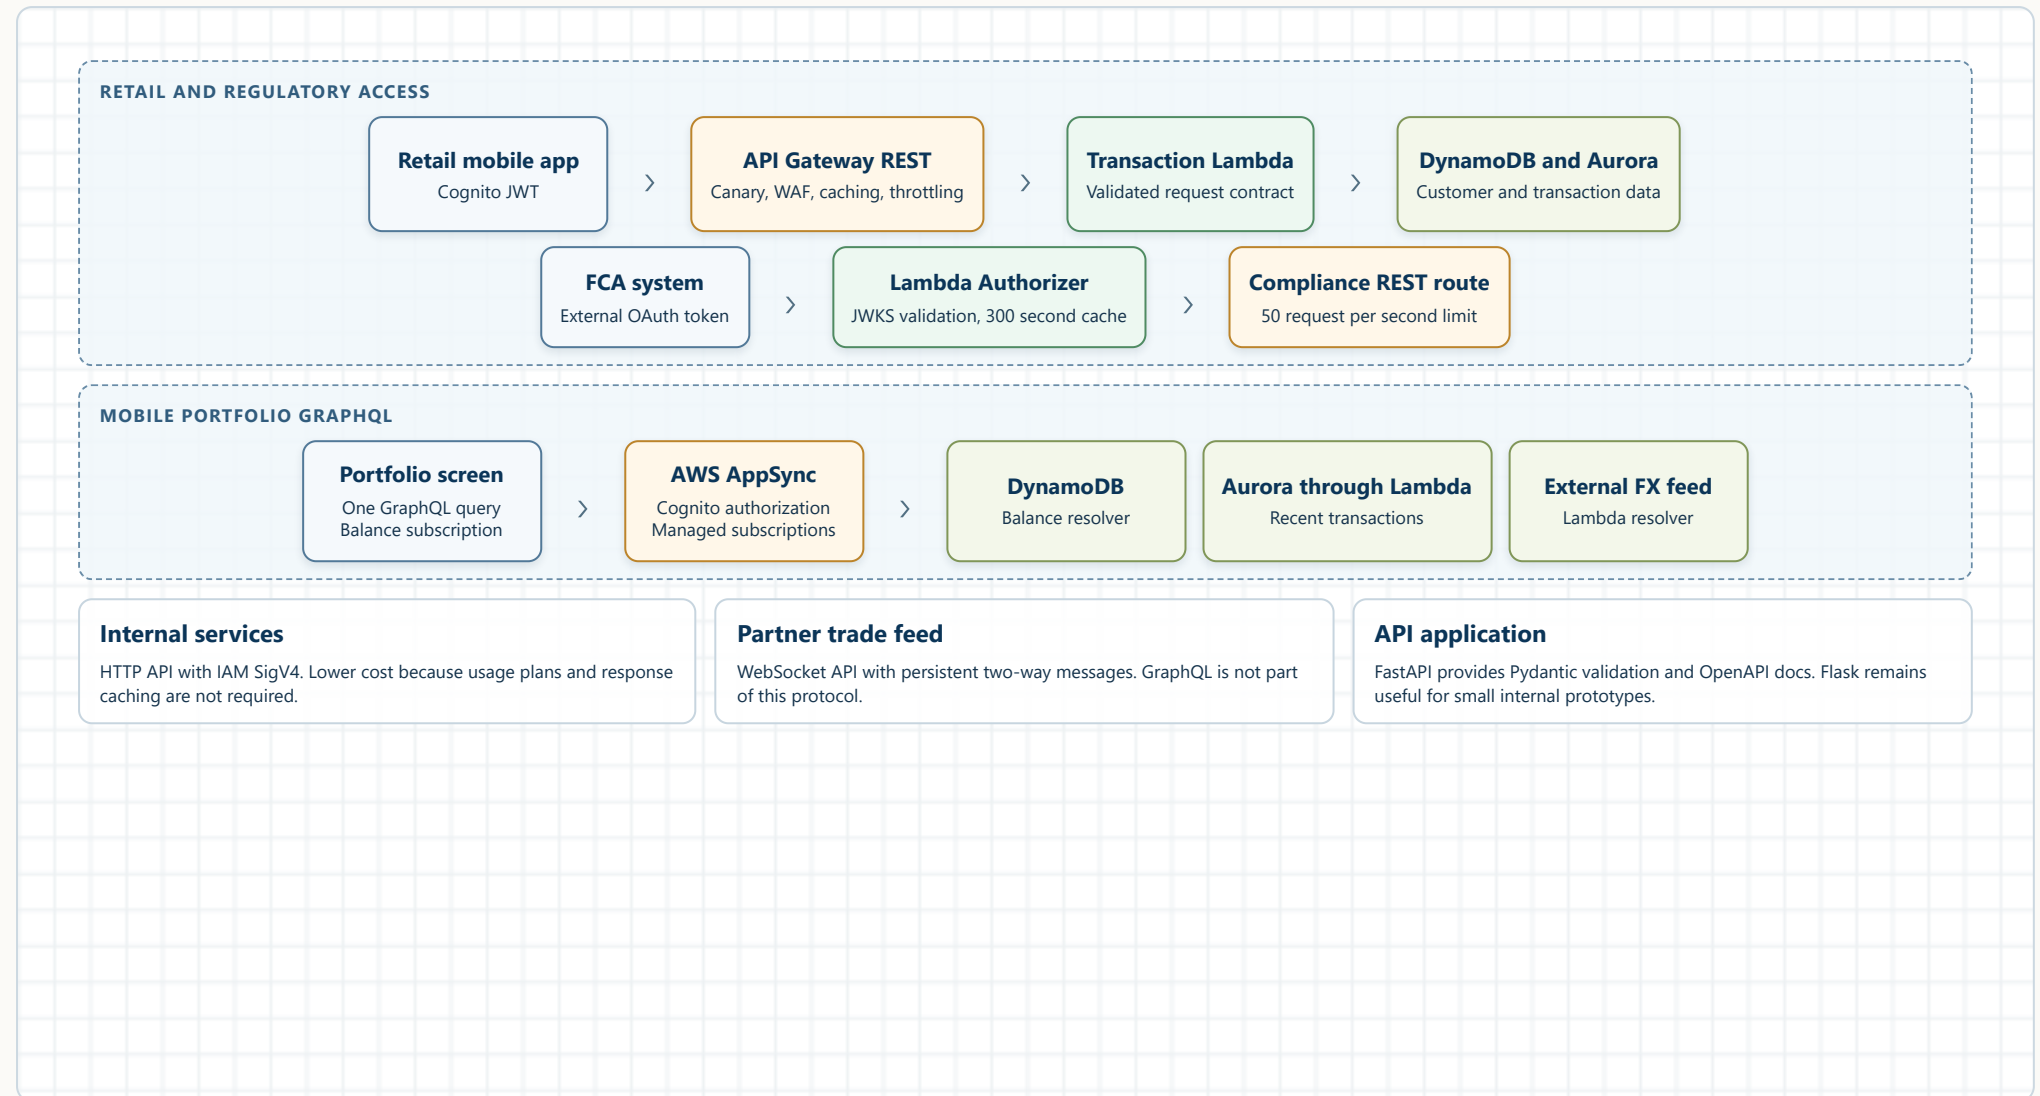

Durable payment intake, independent consumers, event routing, and Saga compensation

API and GraphQL Architecture

Week 7 | Day 2

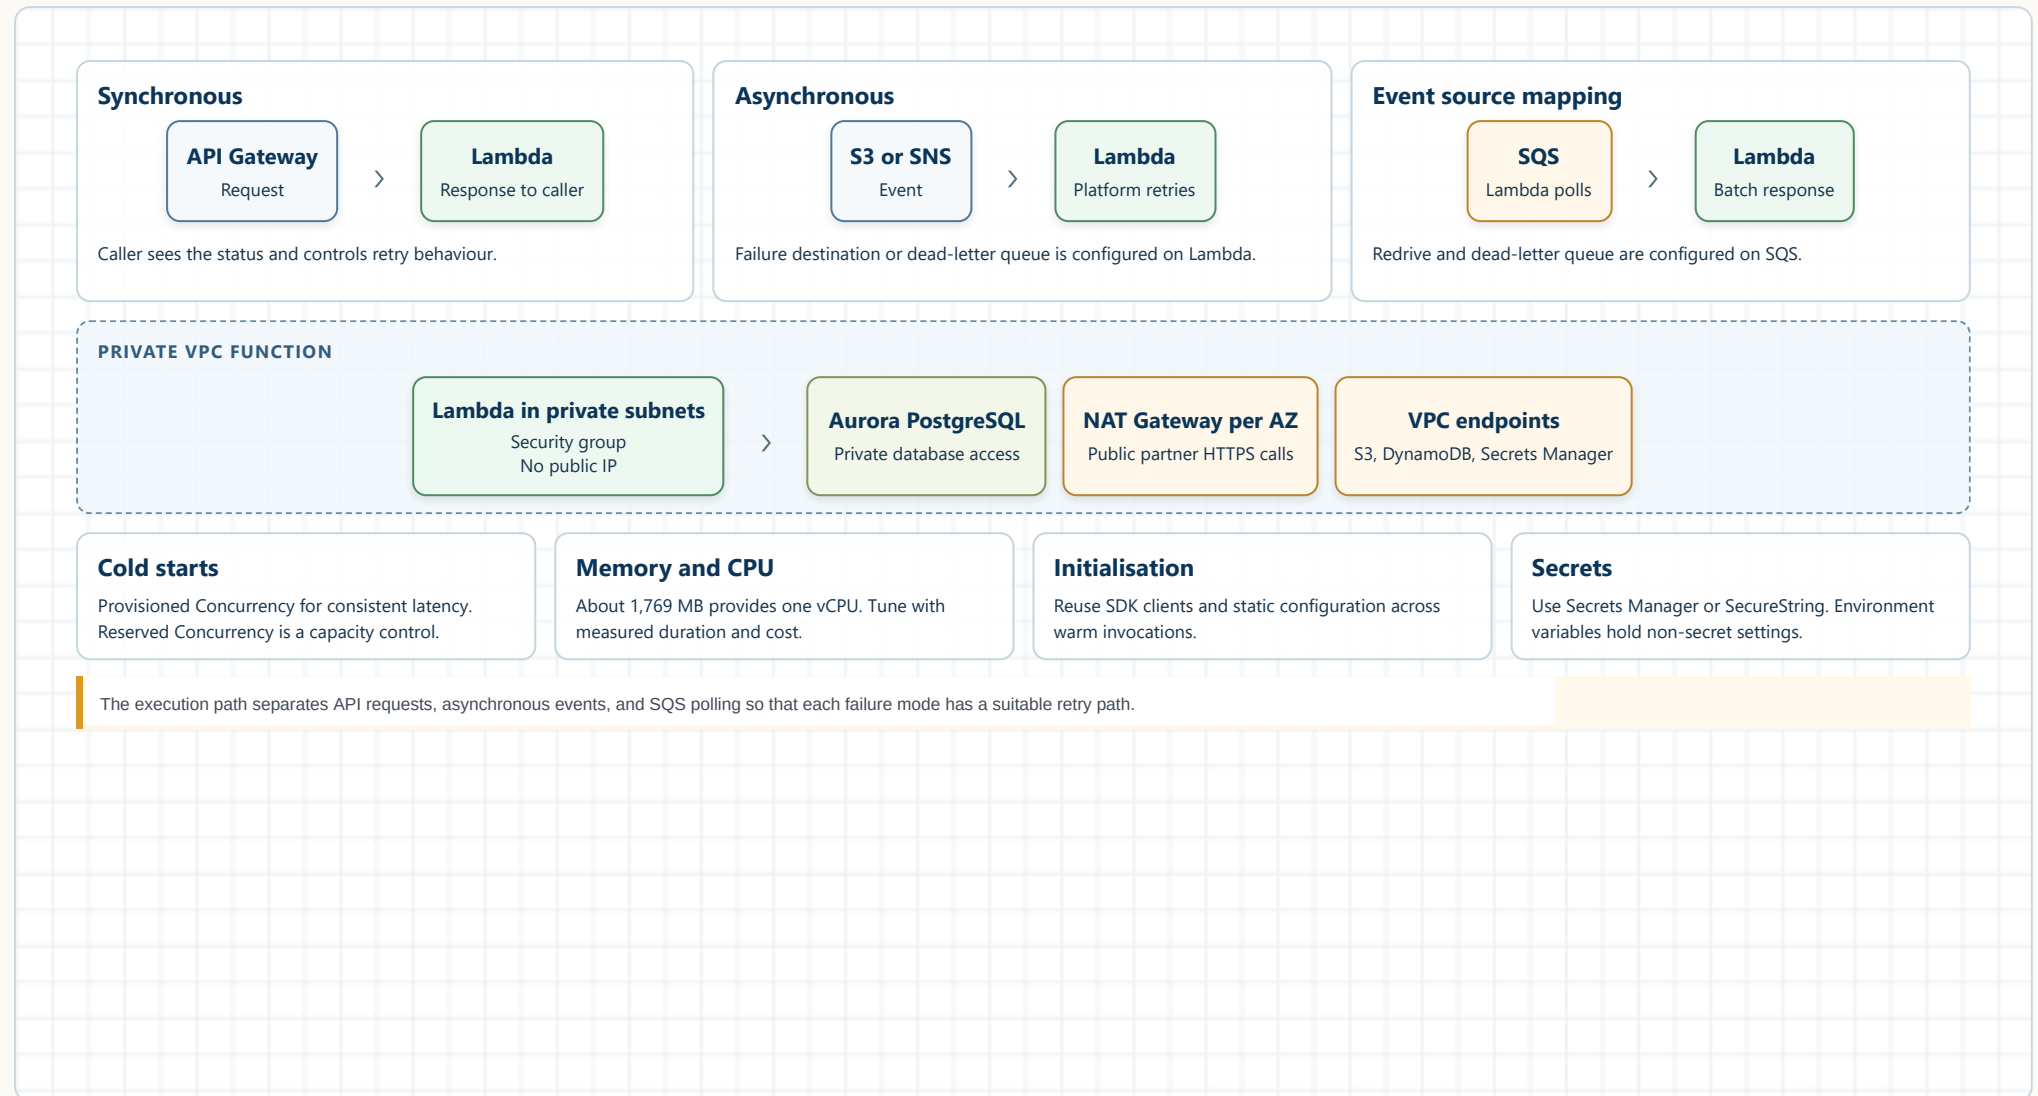

Each consumer uses the API type and authorization method that matches its identity and traffic

Lambda Execution and Failure Design

Week 7 | Day 3

Invocation-specific retry paths, predictable latency, safe configuration, and private networking

Infrastructure, Migration, and Recovery

Reviewed infrastructure changes, incremental service extraction, and recovery matched to business impact

FinTrust Week 7 Application Architecture

Complete path from authenticated request to durable processing, risk alerting, and governed infrastructure
