

FinTrust application strategy

The 285 application portfolio is classified before a movement tool is selected

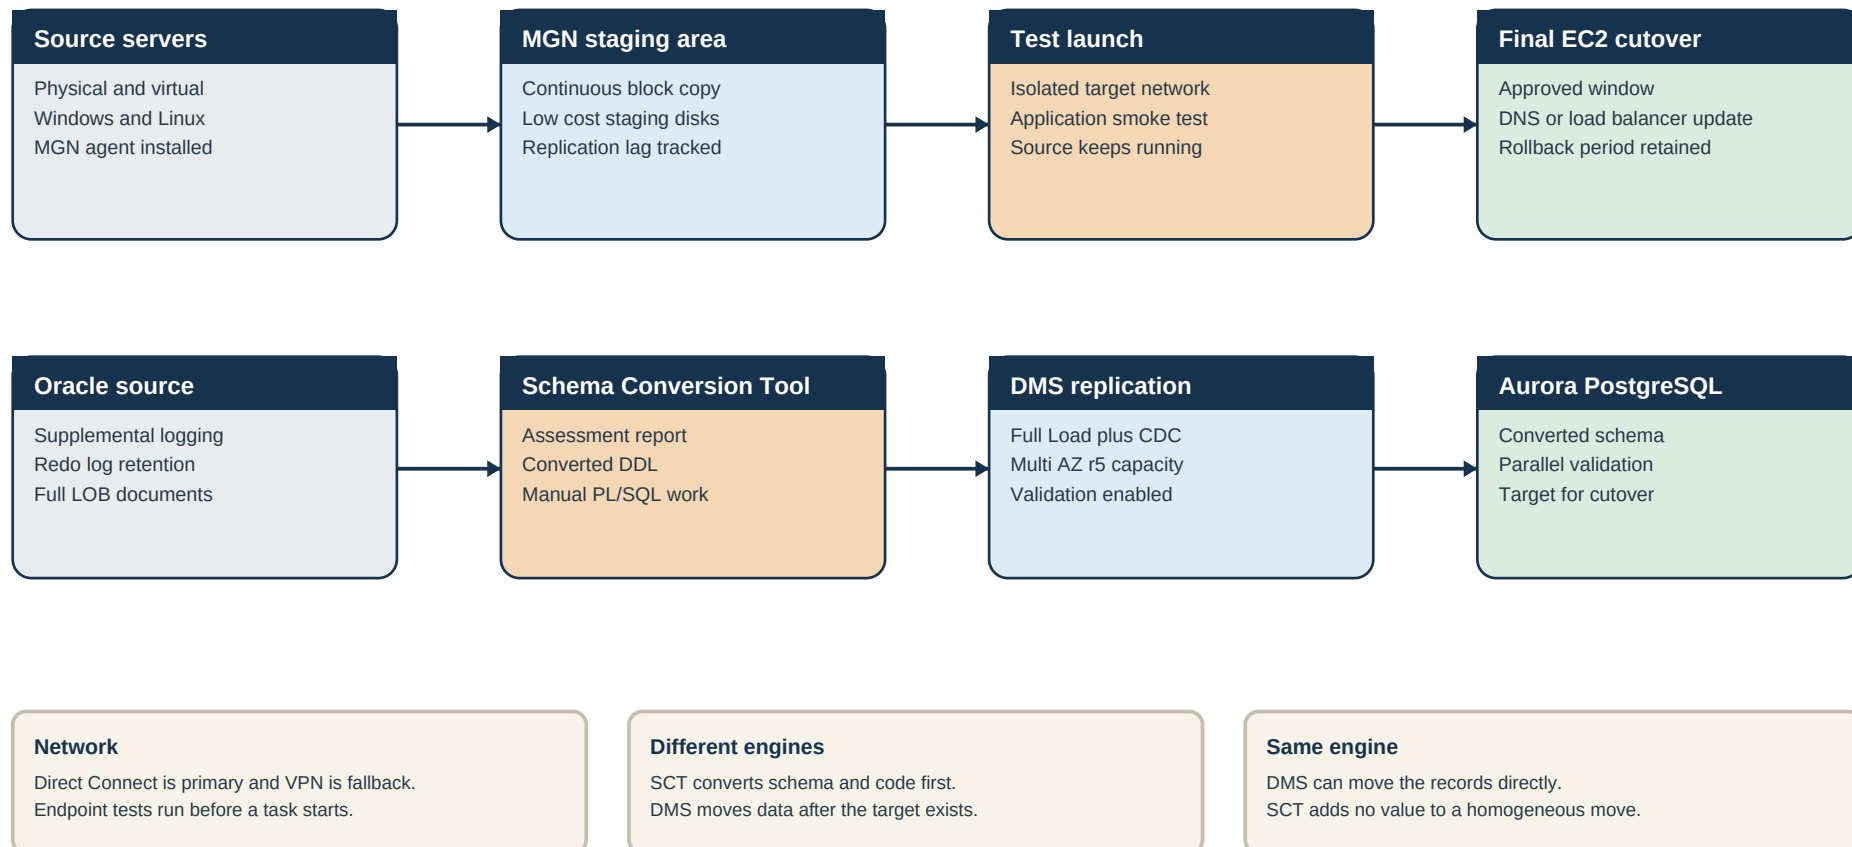

Week 10 | 1 of 5

Server and database movement paths

MGN moves complete server images while SCT and DMS handle database conversion and records

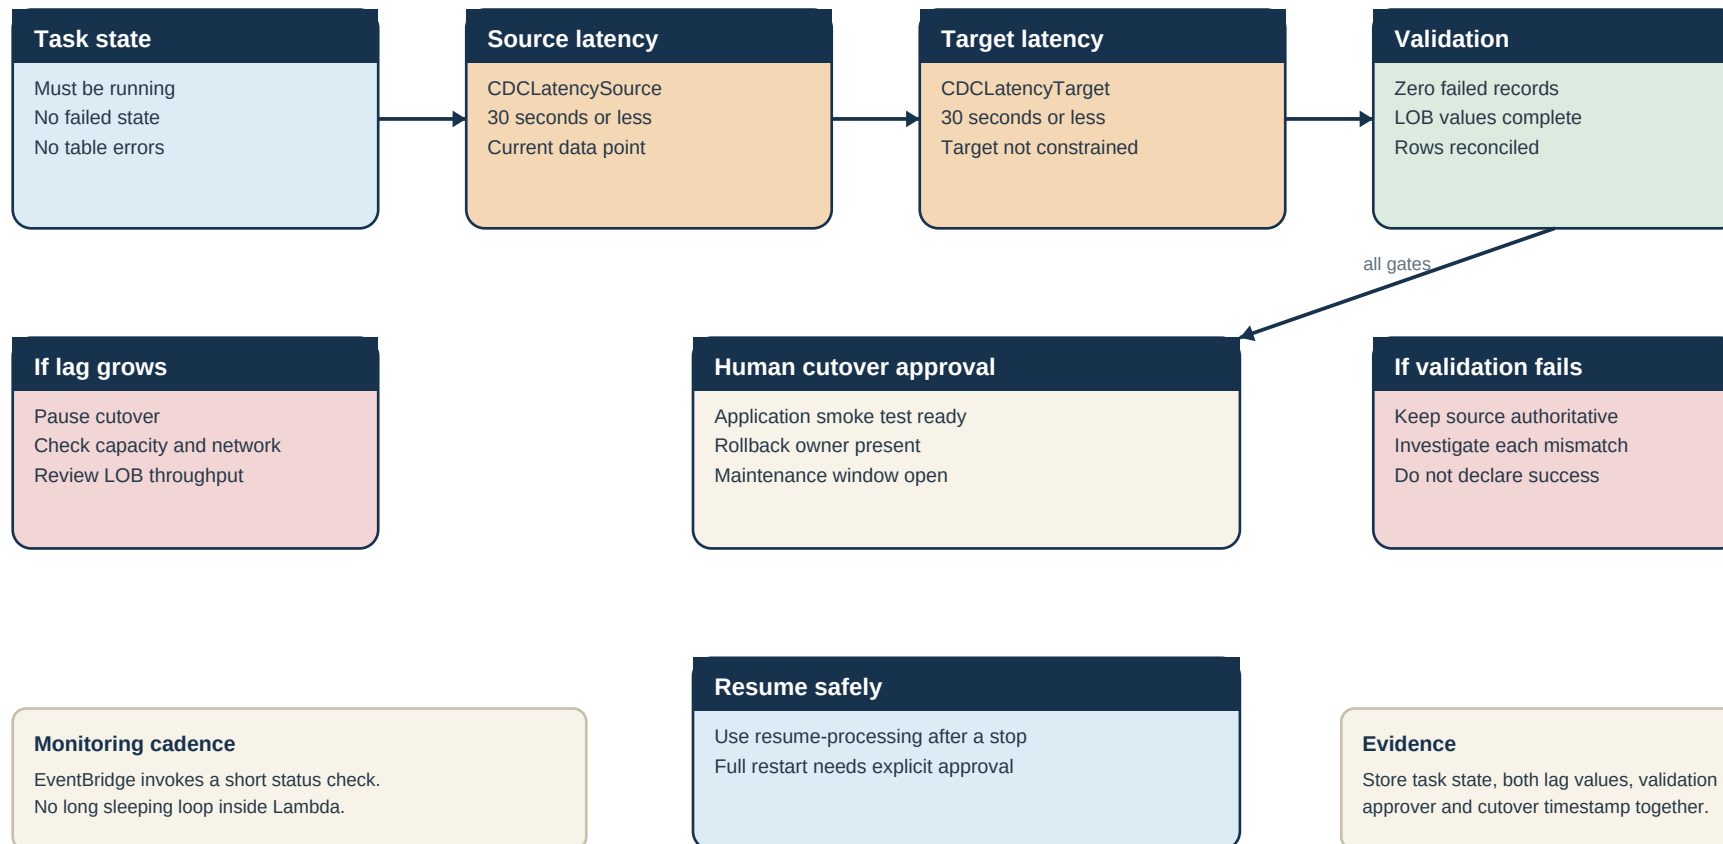

Week 10 | 2 of 5

DMS cutover assurance

Status, lag, validation and application readiness form one controlled release gate

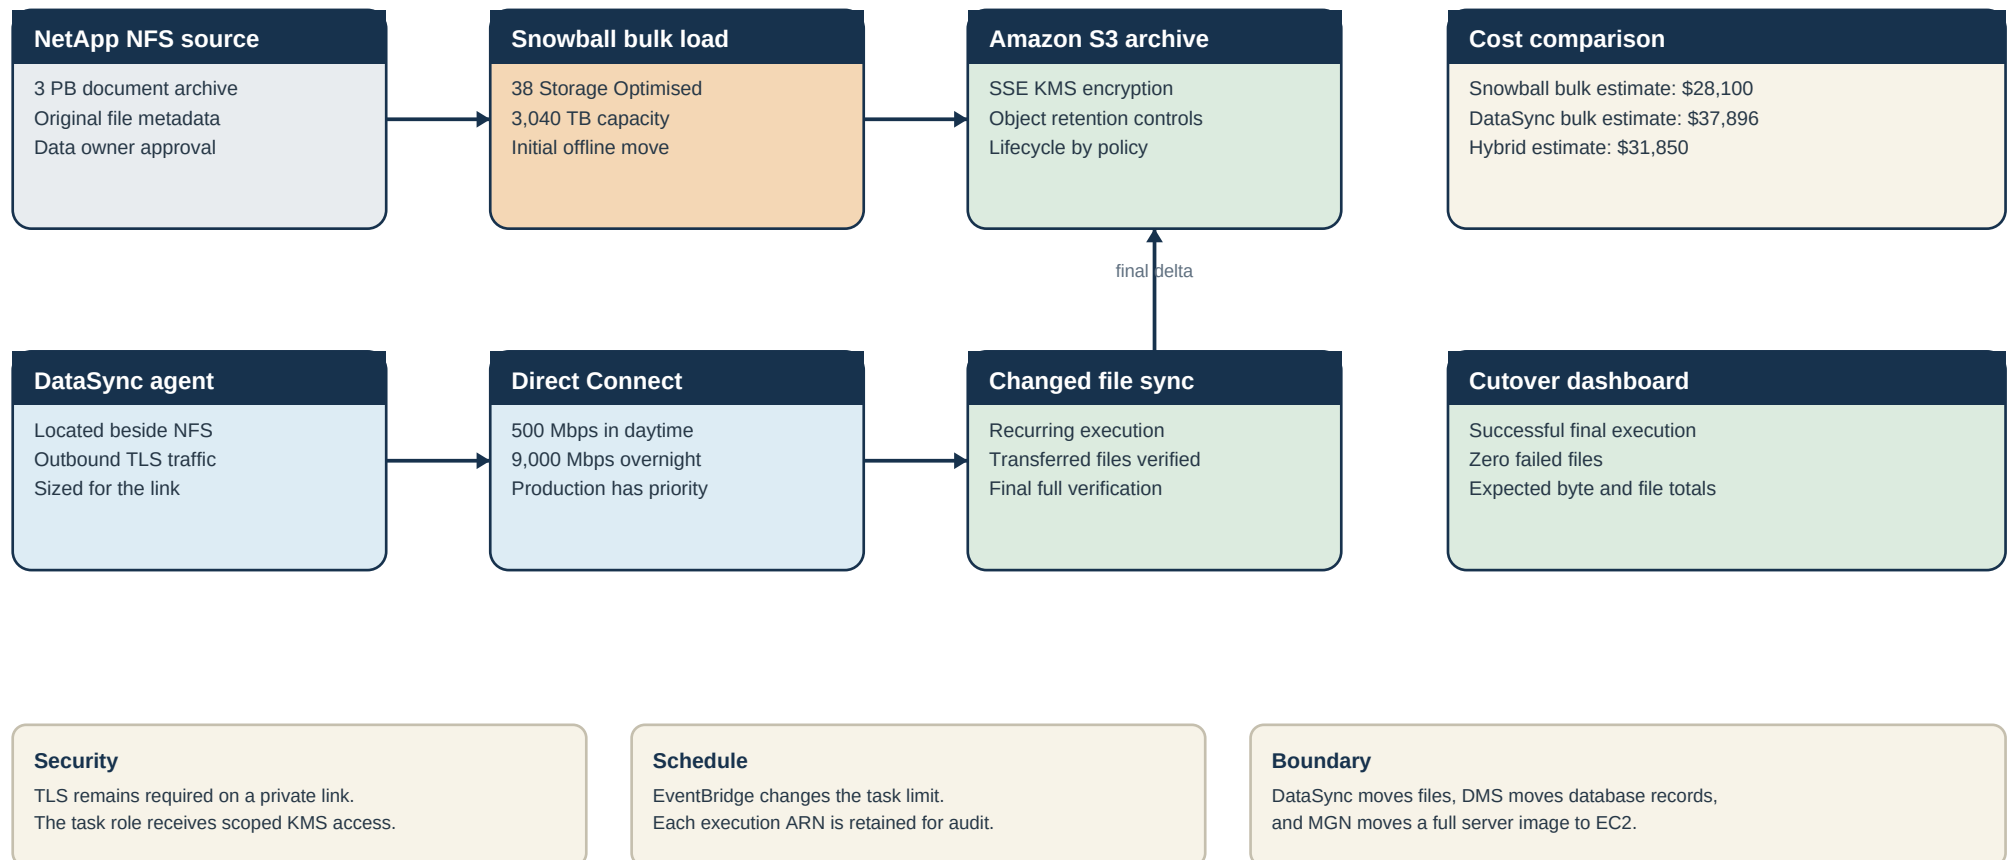

Week 10 | 3 of 5

Compliance archive transfer

Snowball carries the bulk load and DataSync keeps changed files current until final verification

Week 10 | 4 of 5

Automation package and reporting views

Reusable modules handle operations while SQL views provide a stable reporting layer

Week 10 | 5 of 5
